

Learn Your Responsibility for Employee Safety

LEARNING OUTCOMES

- Gain a new perspective to supervisor safety responsibilities and potential liabilities
- Reduce your personal risk
- Recognize practices that reduce the risk
- Identify how to correct situations

WHO SHOULD ATTEND

Supervisors, managers, deans, directors, and department heads that are responsible for supervising employees.

To register, email: HRS-Training@uni.edu with your name and department

ABOUT THE SESSION

Safety is definitely part of a supervisor's responsibility and in most cases the hardest part to focus on. This is because quality, production, and costs are visible, while safety is often invisible until an accident has occurred.

ABOUT THE SESSION LEADER

Gary Higbee is a Certified Safety Professional and has an MBA from the University of Iowa. Gary worked for more than 30 years for John Deere & Company where he held assignments in safety, environmental, production, and engineering. He was also the Corporate Safety Director for Maytag and Manager of Health, Safety & Environmental for the Budd Company Stamping and Frame Division.

Gary has been recognized as the Safety Professional of the Year by Region IV of the American Society of Safety Engineers (ASSE). He has recently published a number of articles including his most recent "The Frustration with Safety."

Using over 39 years of experience and his self denounced dry sense of humor, Gary has become a nationally known speaker on safety, health, environmental and business issues.
